4. Chaos Execution

Kuyfi performs black-box fuzzing against the deployed Soroban contract using its on-chain contract specification.

Vectors executed	89
Broadcast transactions	13
Transactions with hash	13
Verification transactions	2

5. Findings

NO REPORTABLE FINDINGS

No reportable security findings were produced by this audit run. This does not constitute a formal proof that the contract is vulnerability-free.

6. Verification

Real Testnet transactions broadcast during this audit run, provided so every claim above can be independently verified on-chain.
