4. Chaos Execution

Kuyfi performs black-box fuzzing against the deployed Soroban contract using its on-chain contract specification.

Vectors executed	44
Broadcast transactions	0
Transactions with hash	0
Verification transactions	0

5. Findings

NO REPORTABLE FINDINGS

No reportable security findings were produced by this audit run. This does not constitute a formal proof that the contract is vulnerability-free.

6. Verification

Real Testnet transactions broadcast during this audit run, provided so every claim above can be independently verified on-chain.

No transaction ever reached broadcast during this run.
